

JEETU PRASAD

Full-Stack Developer | MERN | Next.js

✉ prasadjeetu760@gmail.com ☎ +91 9356440357 📍 Mumbai, India
💎 github.com/jeetu-programmer7887 🌐 jeetuprasad.in

PROFILE

Full-stack developer specializing in MERN stack and Next.js, with proven expertise building production-grade e-commerce platforms, AI-integrated applications, and high-performance developer portfolios. Strong foundation in REST API design, real-time features, database optimization, and DevOps. Passionate about writing scalable, maintainable code and delivering pixel-perfect user experiences.

EDUCATION

Smt. Chandibai Himathmal Mansukhani College (Mumbai University) July 2023 – April 2026
Bachelor of Science in Information Technology • CGPA: 9.97

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python
Frontend	React.js, Next.js, Tailwind CSS, Framer Motion, SWR
Backend	Node.js, Express.js, REST API design, Prisma ORM
Databases	MongoDB (indexing, aggregation), PostgreSQL (Neon)
APIs and Tools	Groq (Llama 3), Gemini API, Clerk Auth, Razorpay, Git & GitHub, Vercel, Postman

FEATURED PROJECTS

1. Personal Portfolio – jeetuprasad.in

Next.js 14 • TypeScript • Tailwind CSS • Framer Motion • Vercel 🔗 Live 📄 GitHub

2. ZYRO – Premium Jewellery E-Commerce Platform

MERN Stack • MongoDB • Razorpay • Groq API • Gemini API 🔗 Live 📄 GitHub

- Built a complete full-stack SPA with product catalog, cart, wishlist, and checkout; integrated Razorpay for secure payments with OTP authentication.
- Implemented AI features: skin tone detection using Groq (Llama 3) and virtual try-on with Gemini API for personalized jewellery recommendations.
- Optimized MongoDB queries with indexing strategies, reducing API response time by ~25%; built ZYRO Coin loyalty system with auto-expiration logic.
- Implemented inventory locking with 15-minute cron job expiration, infinite scroll with Intersection Observer API, and Brevo SMTP for transactional emails.

3. JPsyche – AI Mental Health Companion

Next.js 16 • TypeScript • Clerk Auth • Neon PostgreSQL • Gemini API 🔗 Live 📄 GitHub

- Orchestrated Google Gemini API integration with carefully crafted system prompts for empathetic, context-aware mental health dialogue with streaming responses.
- Architected serverless data layer with Neon PostgreSQL and Prisma ORM, enabling scalable, type-safe schema management with persistent session history.
- Implemented text-to-speech with automatic language detection (Hindi/English), message editing with thread forking, and 3-message trial for guest users.
- Built a responsive mobile-first UI with dark mode, chat management (rename/delete/list), optimistic updates via SWR, and full accessibility (ARIA labels).
